Hoofbosch Investment Fund (ISIN: NL0006327413)

This fund is managed by De Grote Voskuil Capital B.V.

Objectives and Investment Policy

Goal

The objective of Hoofbosch Investment Fund is the long term growth of capital at an acceptable risk. The fund seeks to achieve an average return over the long-term (10-15 years) of at least 7% per year, after the deduction of all costs.

Investment

Hoofbosch Investment Fund invests primarily in shares of solid companies and bonds of reliable authorities.

Dividends

The fund does not distribute dividends, but reinvests dividends and interest, as well as investment gains.

In and out, minimum participation amount

You can get in or get out of the fund on every first working day of the month or on any other day set by the manager of the fund. The minimum subscription is € 100,000.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 10 years.

Risk and reward profile

The value of an investment in the fund may fluctuate.

Historical data, such as used for the calculation of the risk indicator, do not provide a reliable indication of future risk. It is not guaranteed that the listed risk and reward category remains unchanged. The lowest category does not mean that the investment is without risk.

The fund invests primarily in shares of solid companies and bonds of reliable authorities. Thereby, it falls under the Risk Class 4. Taking into consideration the historical volatility of the fund over the last five years, the fund falls under the Risk Class 4.

The following five risks are most important for the fund and are not adequately reflected by the indicator:

- Price risk: The stock price of the securities in which the fund invests may fluctuate.
- Credit risk: The value of investments in fixed income securities can be affected by positive or negative developments in the creditworthiness of respective issuers and debtors.
- Currency Risk: The fund's investments may not hedge currency positions other than with fluctuations in the euro.
- Concentration risk: Investments will only be made in about 15 to 20 companies, so this can lead to greater fluctuation.
- Counterparty risk: The risk that an issuer or counterparty fails to meet its obligations.

In Section 4 of the prospectus, "Risks", you will find a more detailed description of these and other risks of the fund.

Costs

Earnings will be used to cover administrative expenses and the costs incurred by the fund may reduce returns on your investment.

In addition to these costs, it is possible that your bank or advisor may also charge a fee.

The percentage of the operational costs is based on the costs incurred by the fund (including transaction costs) in the past year ending 31 December 2016. This percentage can vary each year.
